DOWNLOAD FILM

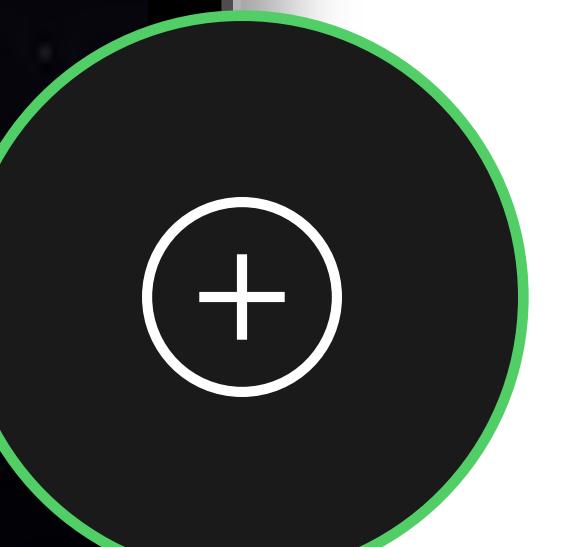

To download a film, **click on the arrow**.

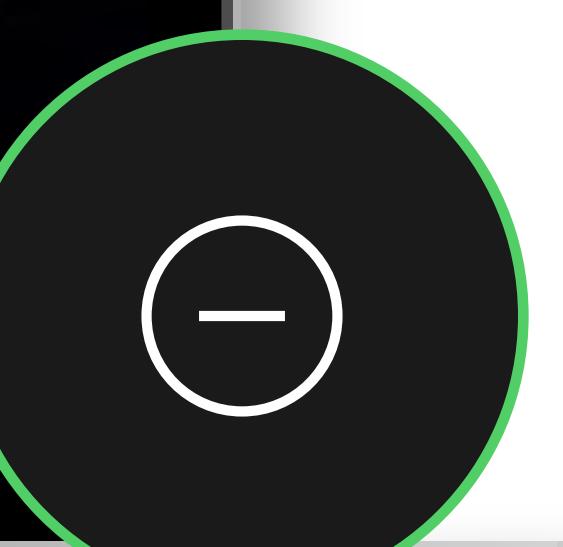

To turn on a film, **click on Play film**.

To add a film to a playlist, **click on Add to playlist**.

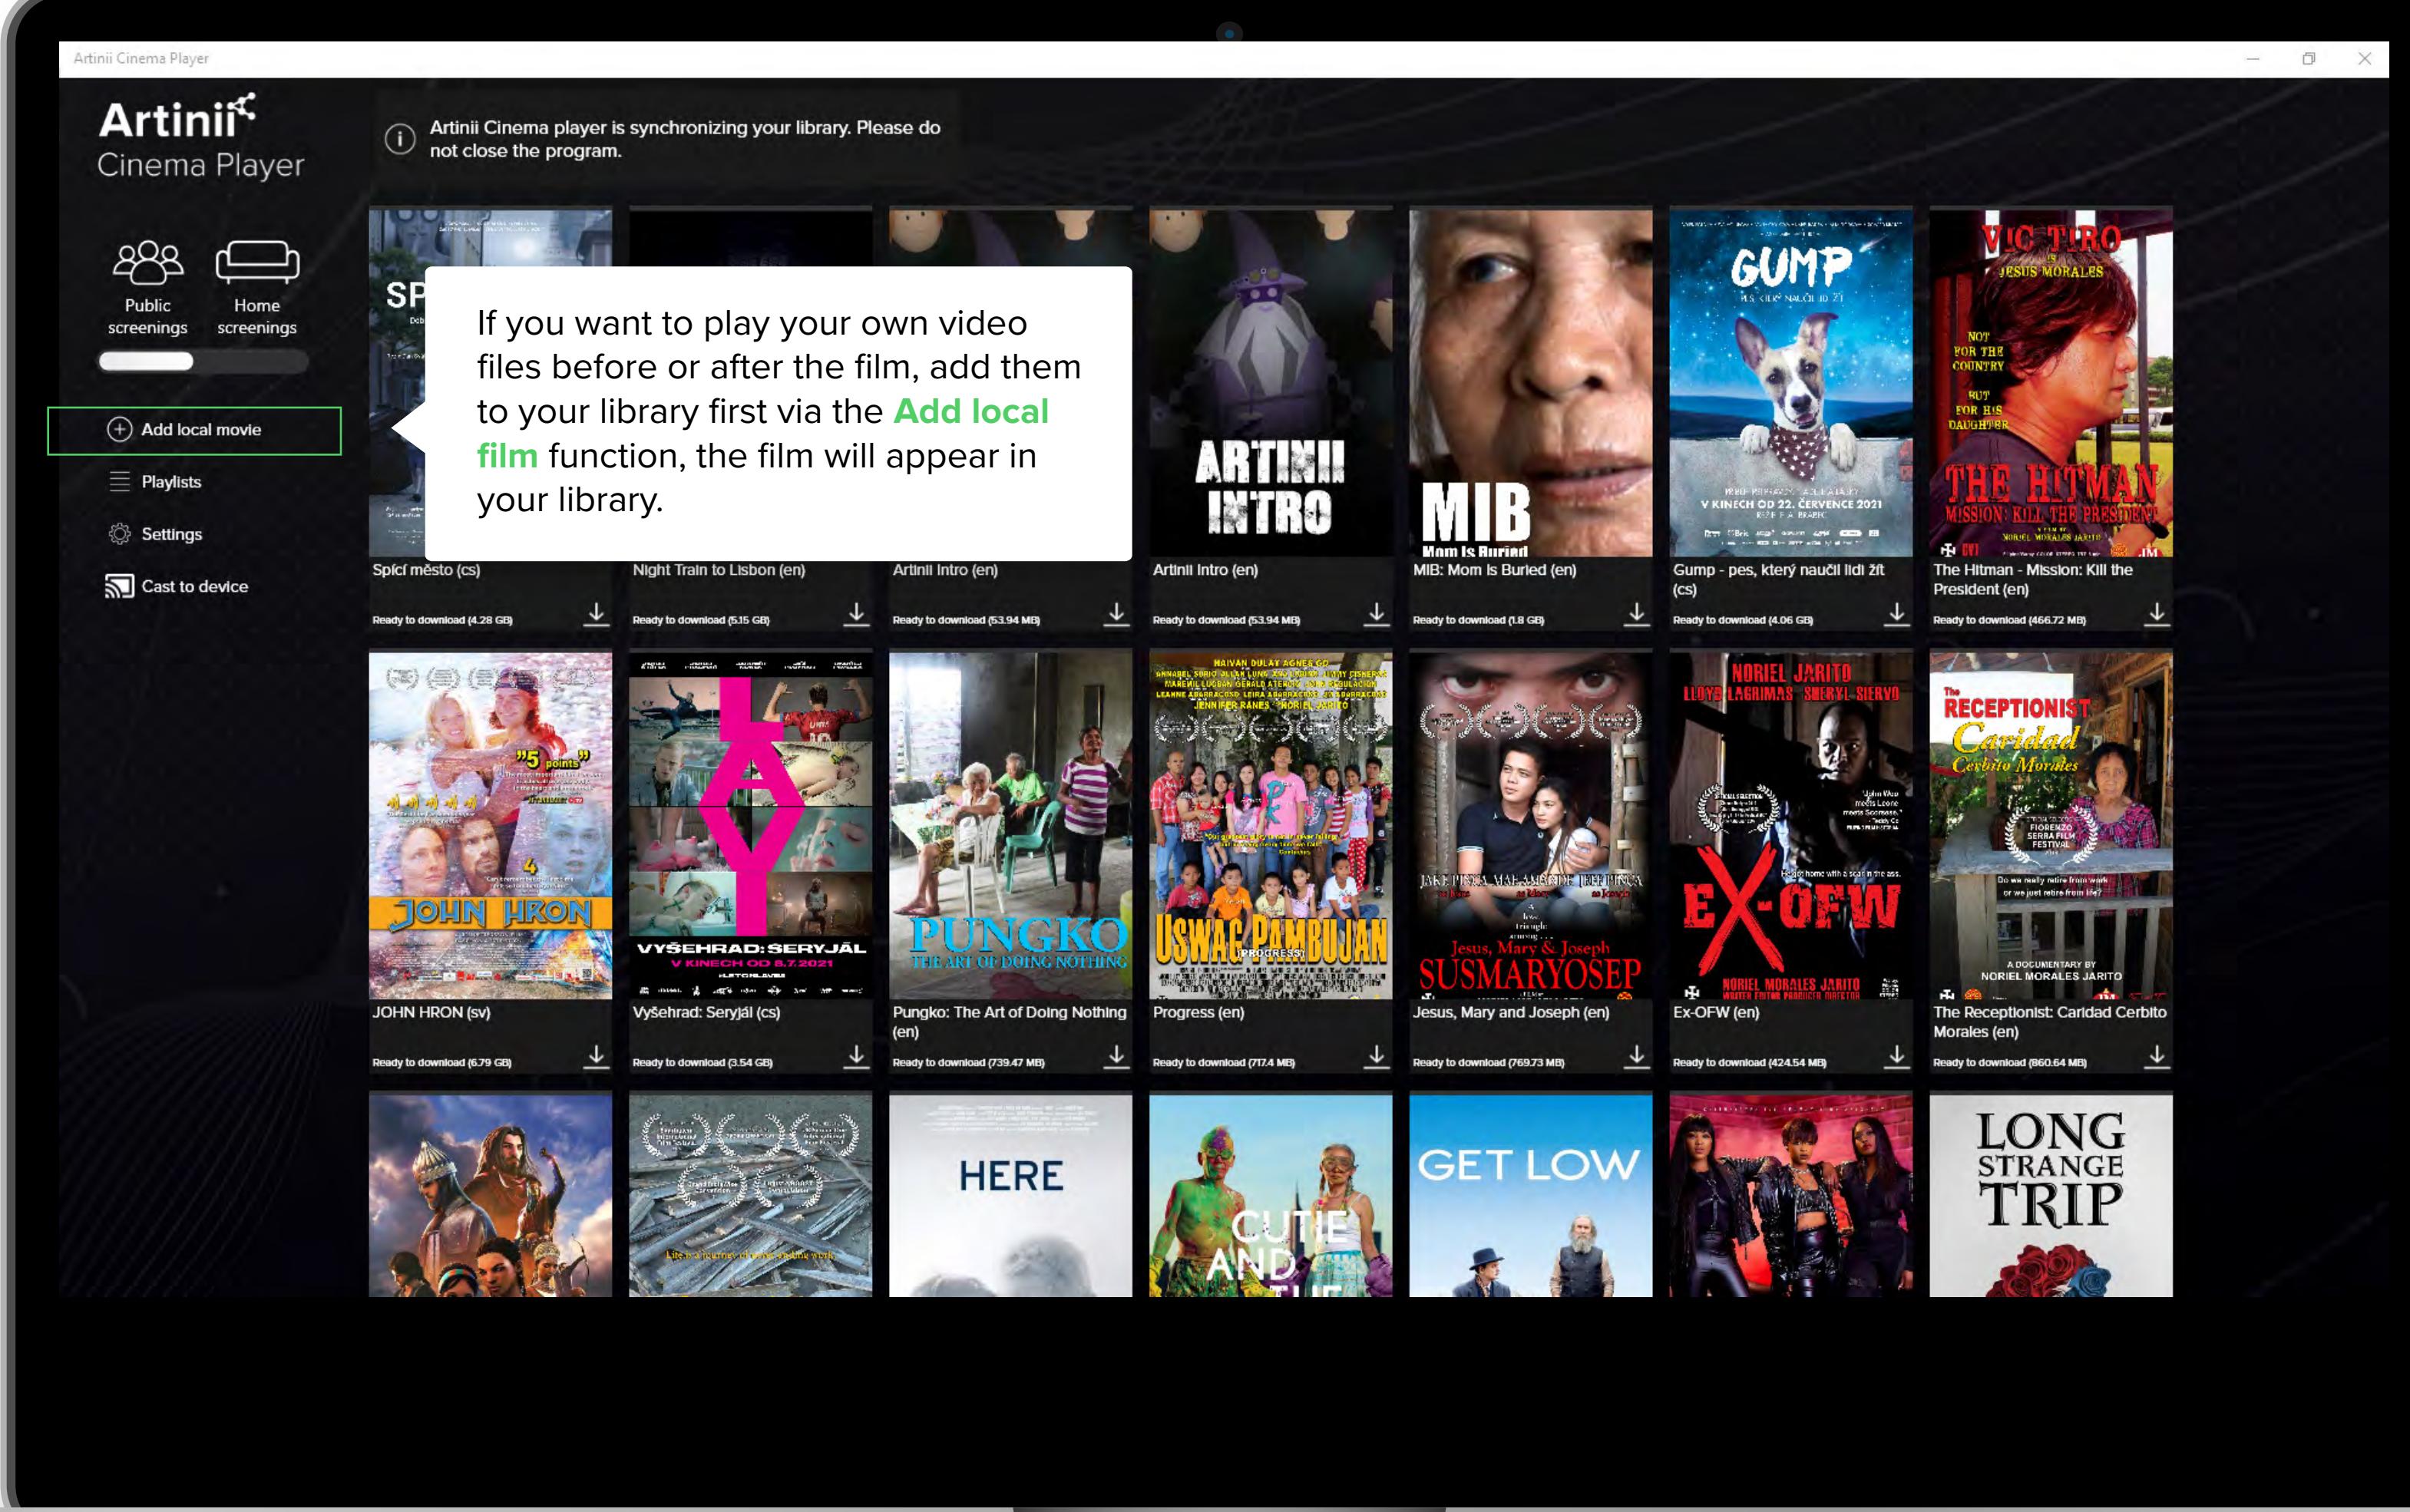

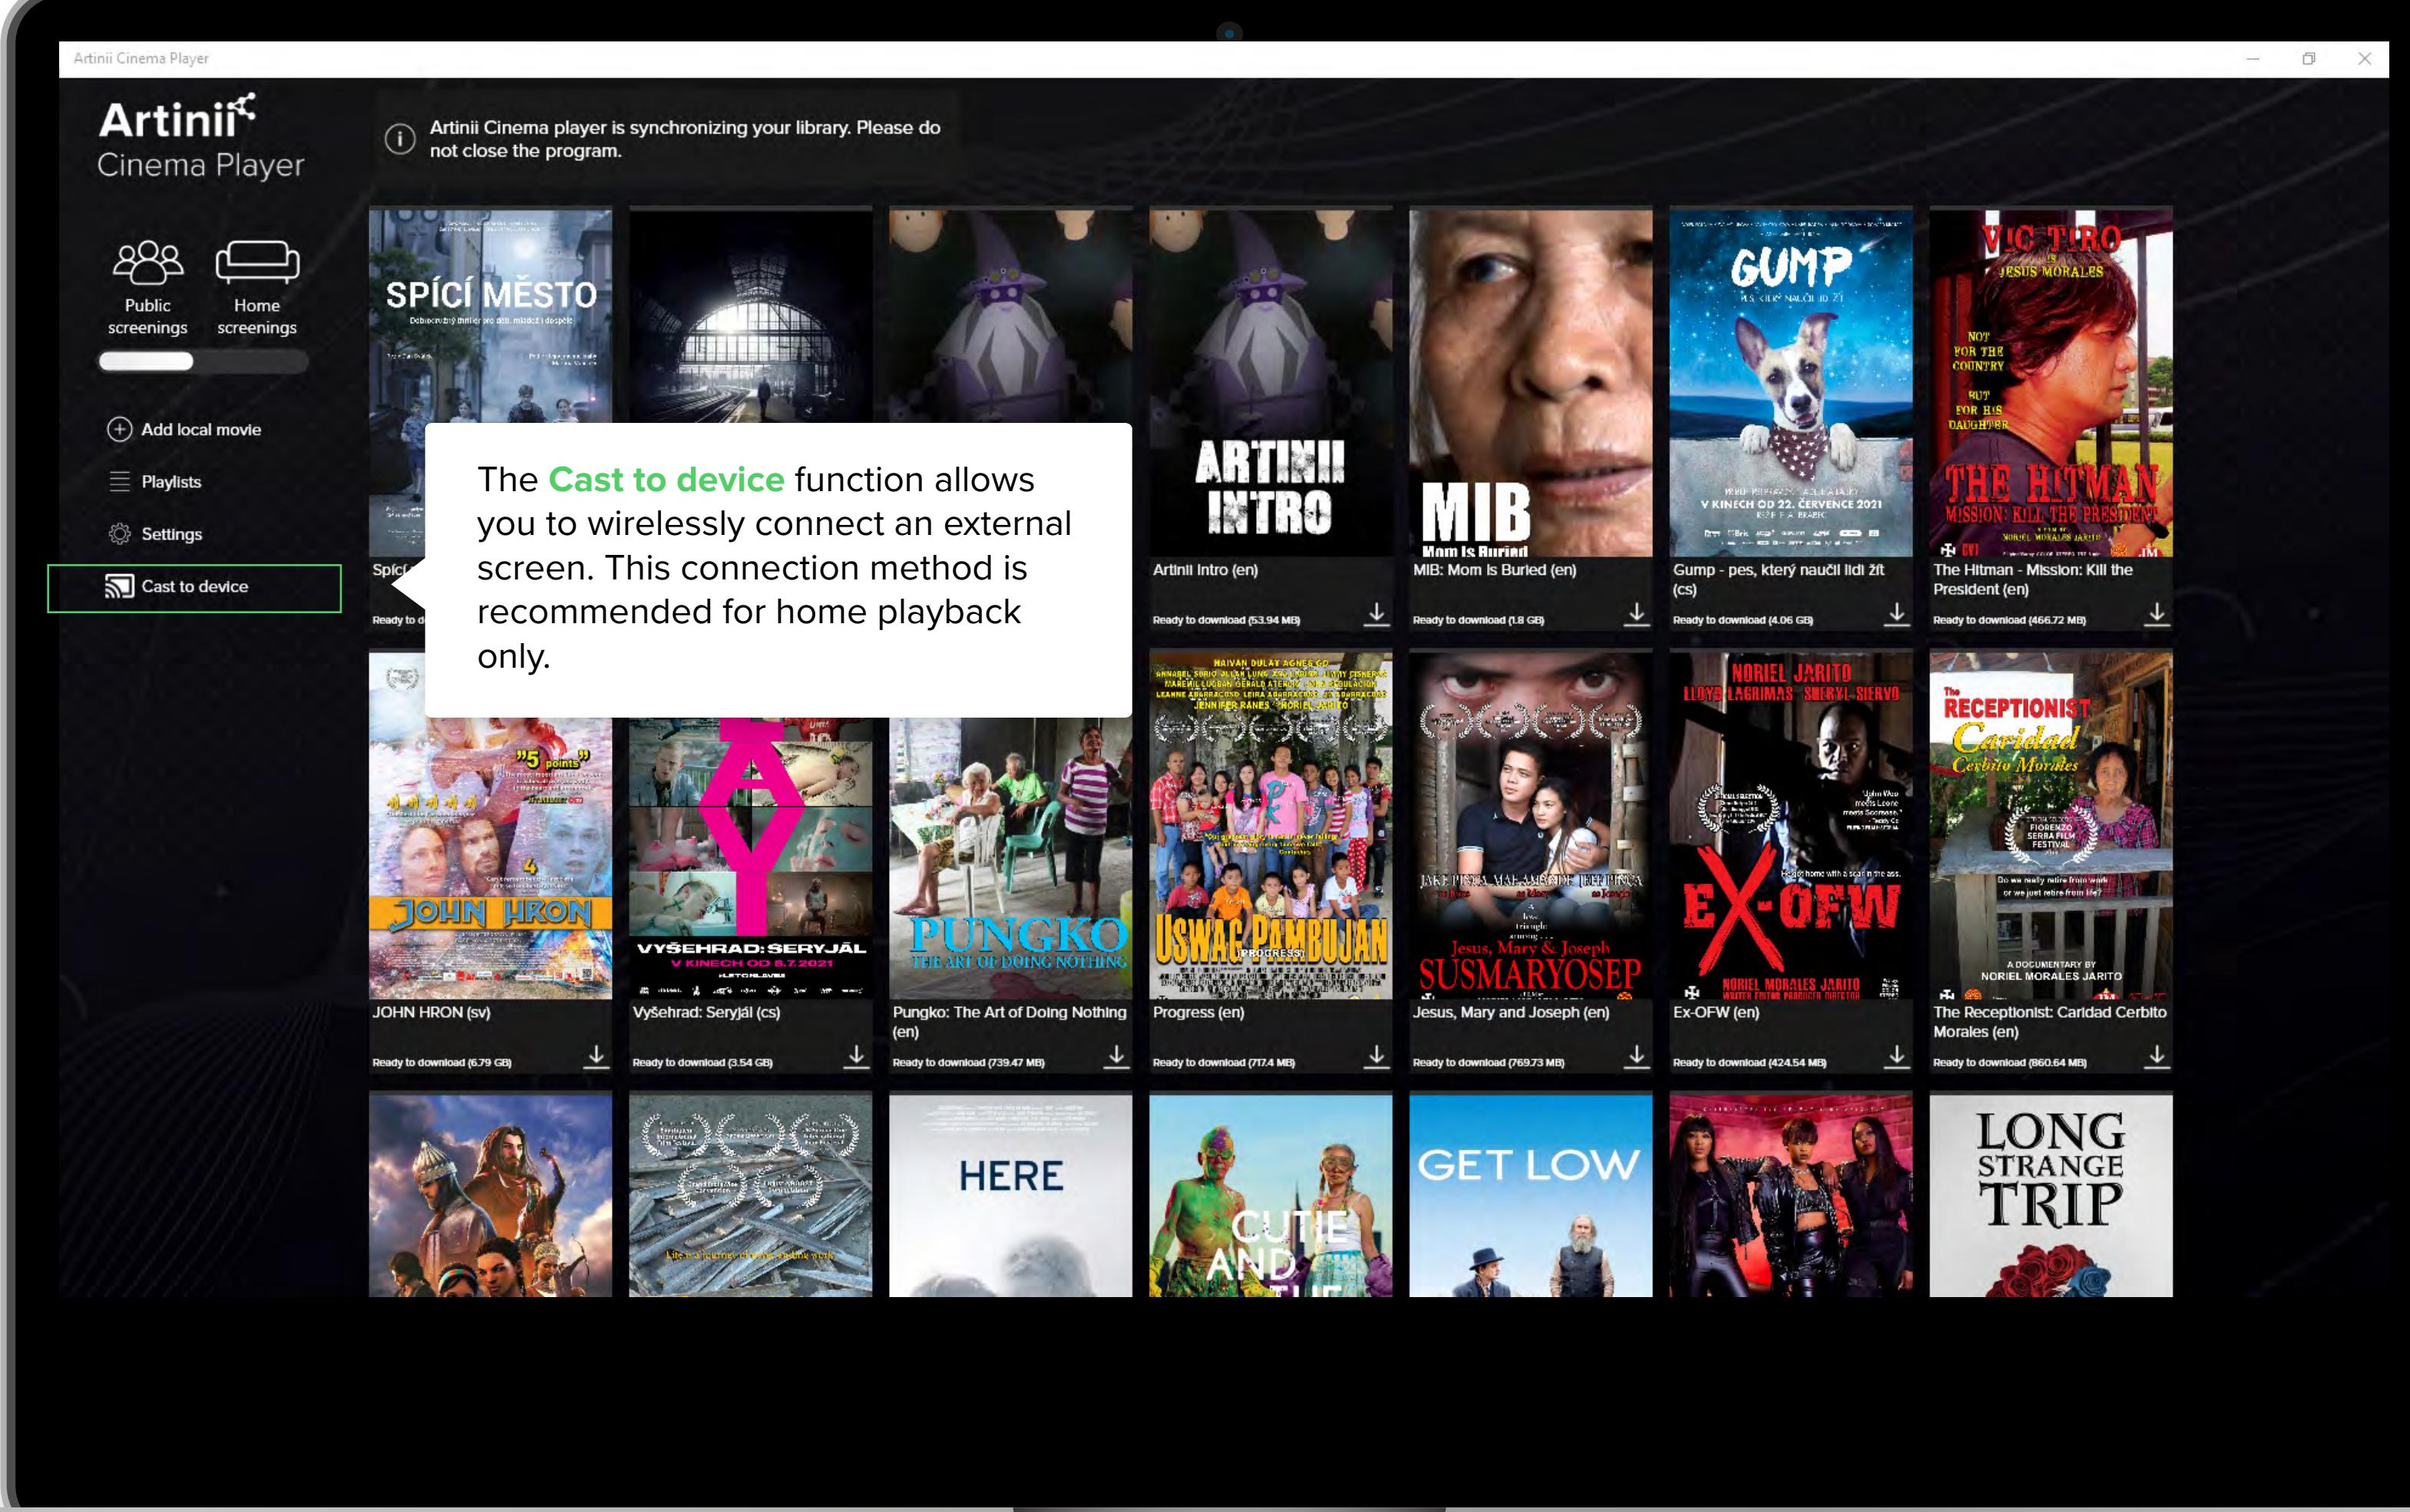

To delete a film from your PC, **click on Remove from disk**.

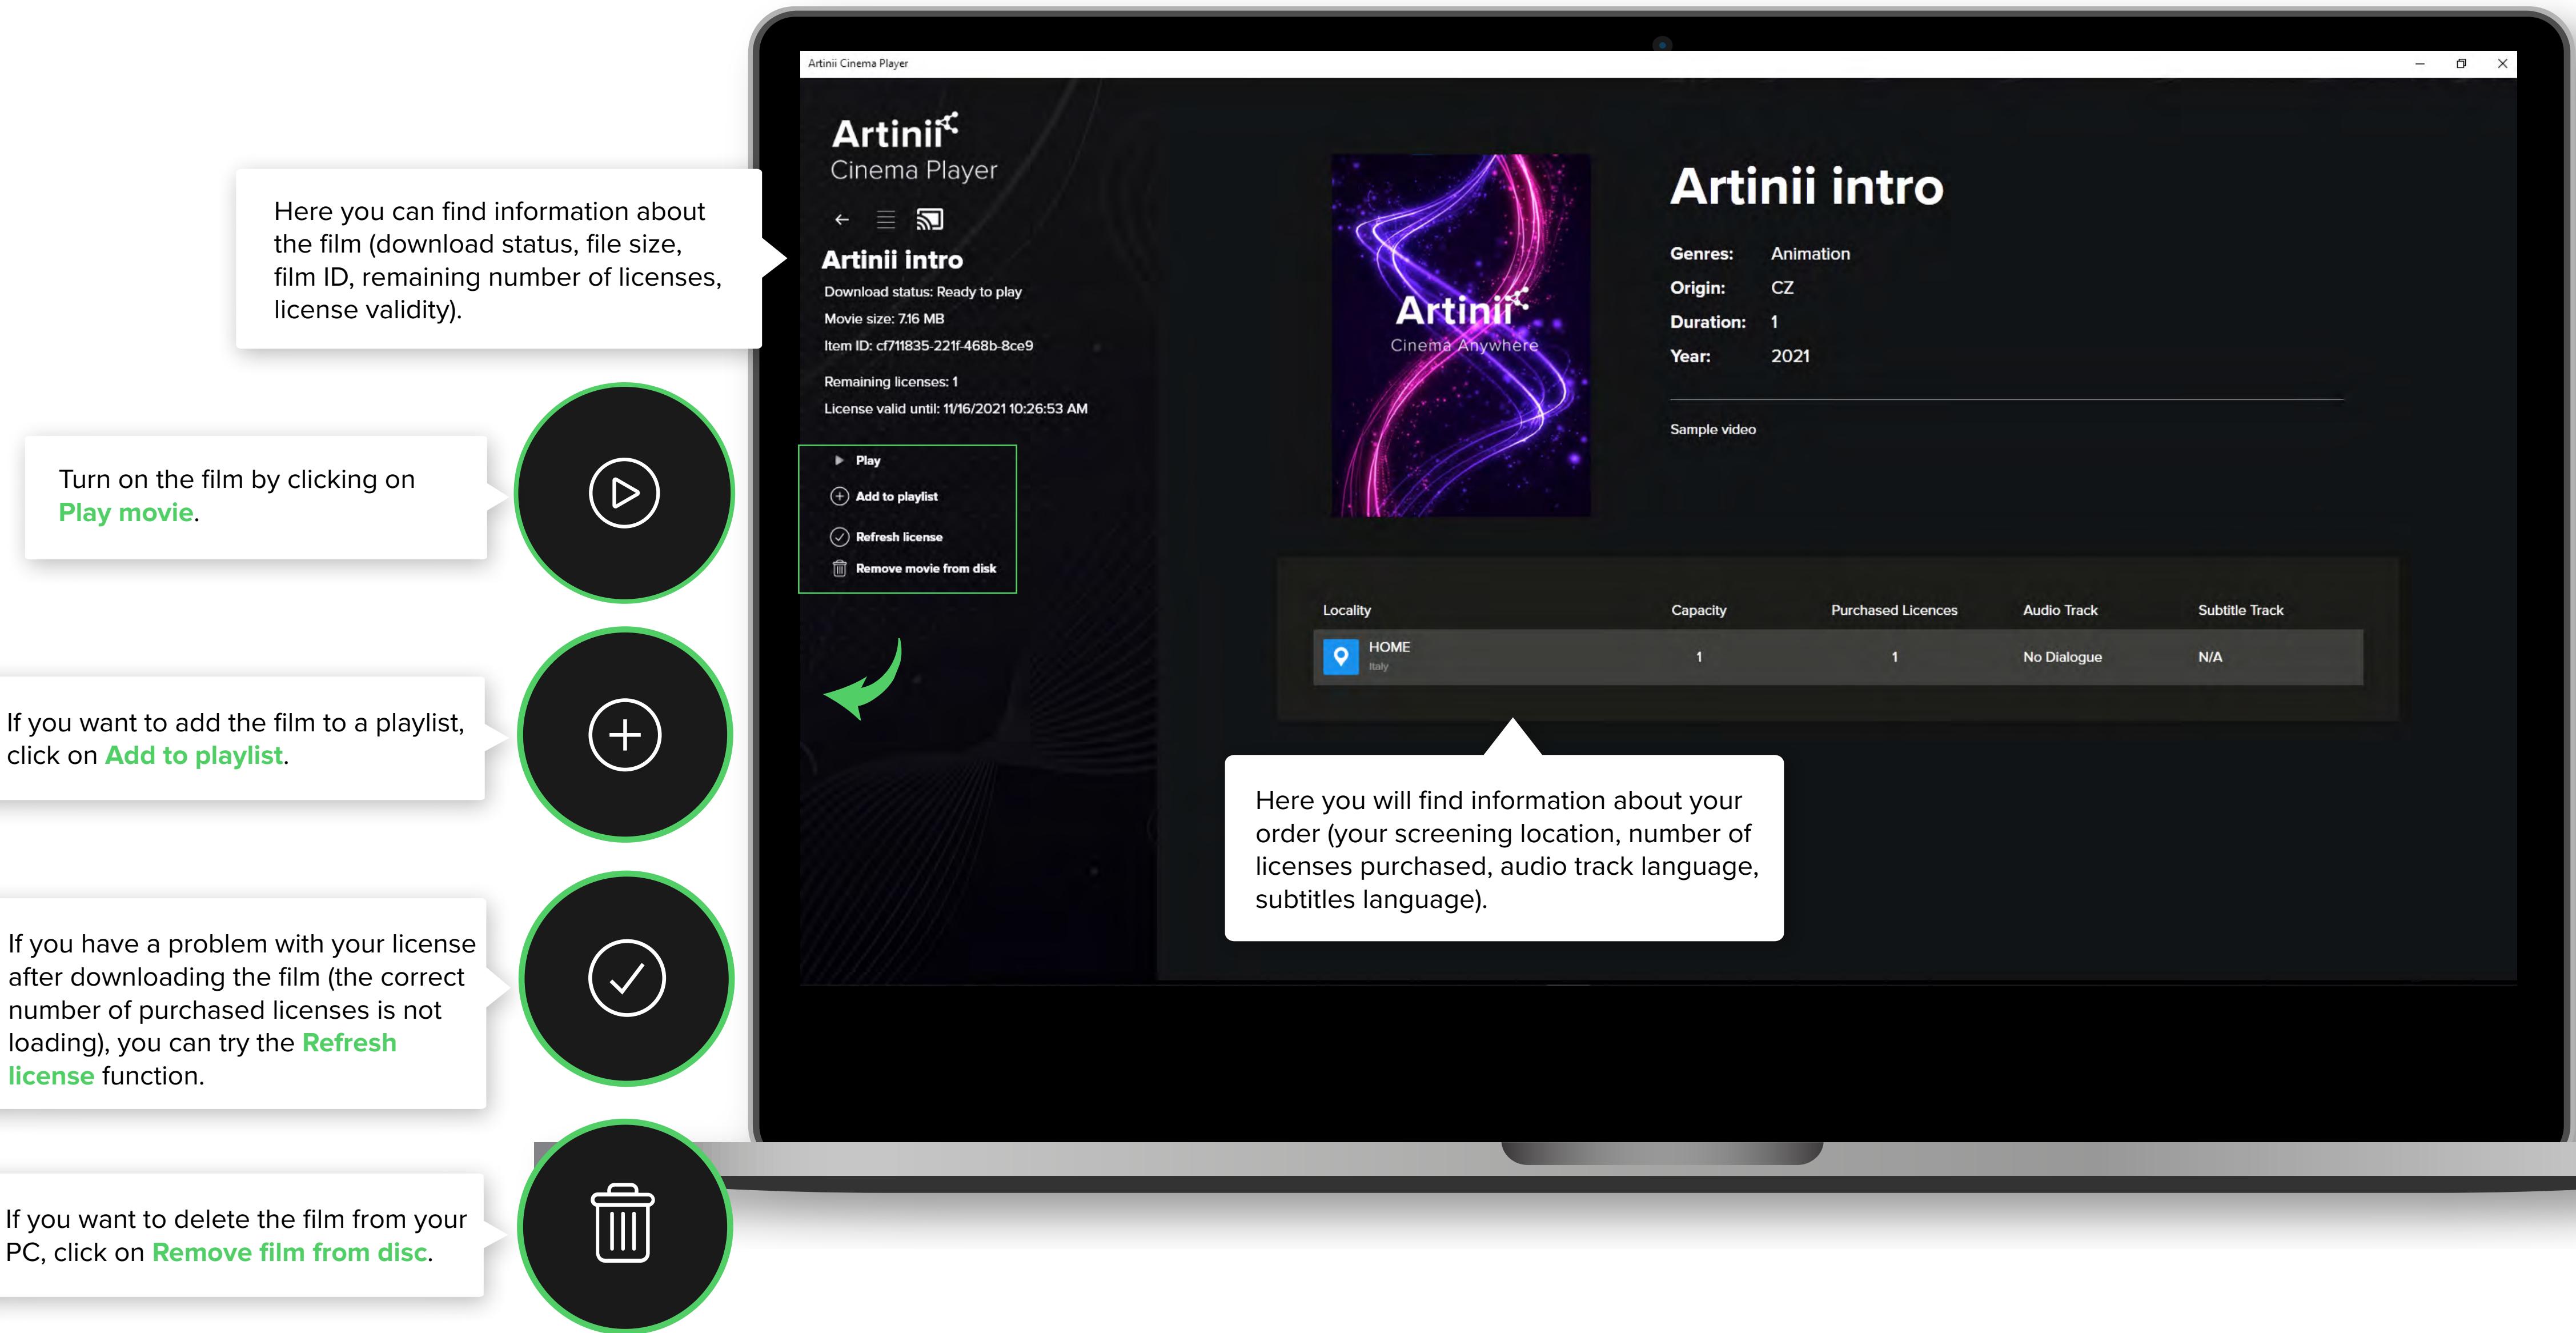

The screenshot shows the Artinii Cinema Player application running on a Windows operating system. The main window displays a grid of movie thumbnails, each with its title, language, and download status. A large circular overlay on the left side highlights the navigation bar at the top. The navigation bar includes icons for 'Public screenings' (selected) and 'Home screenings', along with other options like 'Add local movie', 'Playlists', 'Settings', and 'Cast to device'. Below the navigation bar, the main content area shows a 4x6 grid of movie thumbnails. Some titles visible include 'SPÍČÍ MĚSTO', 'NIGHT TRAIN TO LISBON', 'ARTINII INTRO', 'MIB: Mom Is Buried', 'GUMP', 'VIC TIRO', 'THE HITMAN', 'JOHN HRON', 'VYSEHRAD: SERÝJÁL', 'PUNGKO', 'USWAG PAMBUJAN', 'PROGRESS', 'Jesus, Mary & Joseph', 'SUSMARYOSEP', 'Ex-OFW', 'The RECEPTIONIST', 'Caridad Cebrito Morales', 'HERE', 'GET LOW', 'CUTE AND STUPID', and 'LONG STRANGE TRIP'. Each thumbnail includes a download progress bar and a file size indicator.

Have you purchased a film for public screening?
You will find the film in public screening mode. Therefore you will see the orders for home screening in home screening mode.

FILM DETAIL

FILM DETAIL

The screenshot shows the Artinii Cinema Player application window. On the left, a sidebar displays movie details for "Artinii intro":

- Download status: Ready to play
- Movie size: 7.16 MB
- Item ID: cf711835-221f-468b-8ce9
- Remaining licenses: 0
- License valid until: 11/16/2021 10:26:53 AM

Below these details are several actions:

- ▶ Play
- + Add to playlist
- ⟳ Refresh license
- trash Remove movie from disk
- Request emergency license** (highlighted with a green arrow)

On the right, the main panel shows the movie title "Artinii intro" with a purple abstract background image. Below the title are movie metadata:

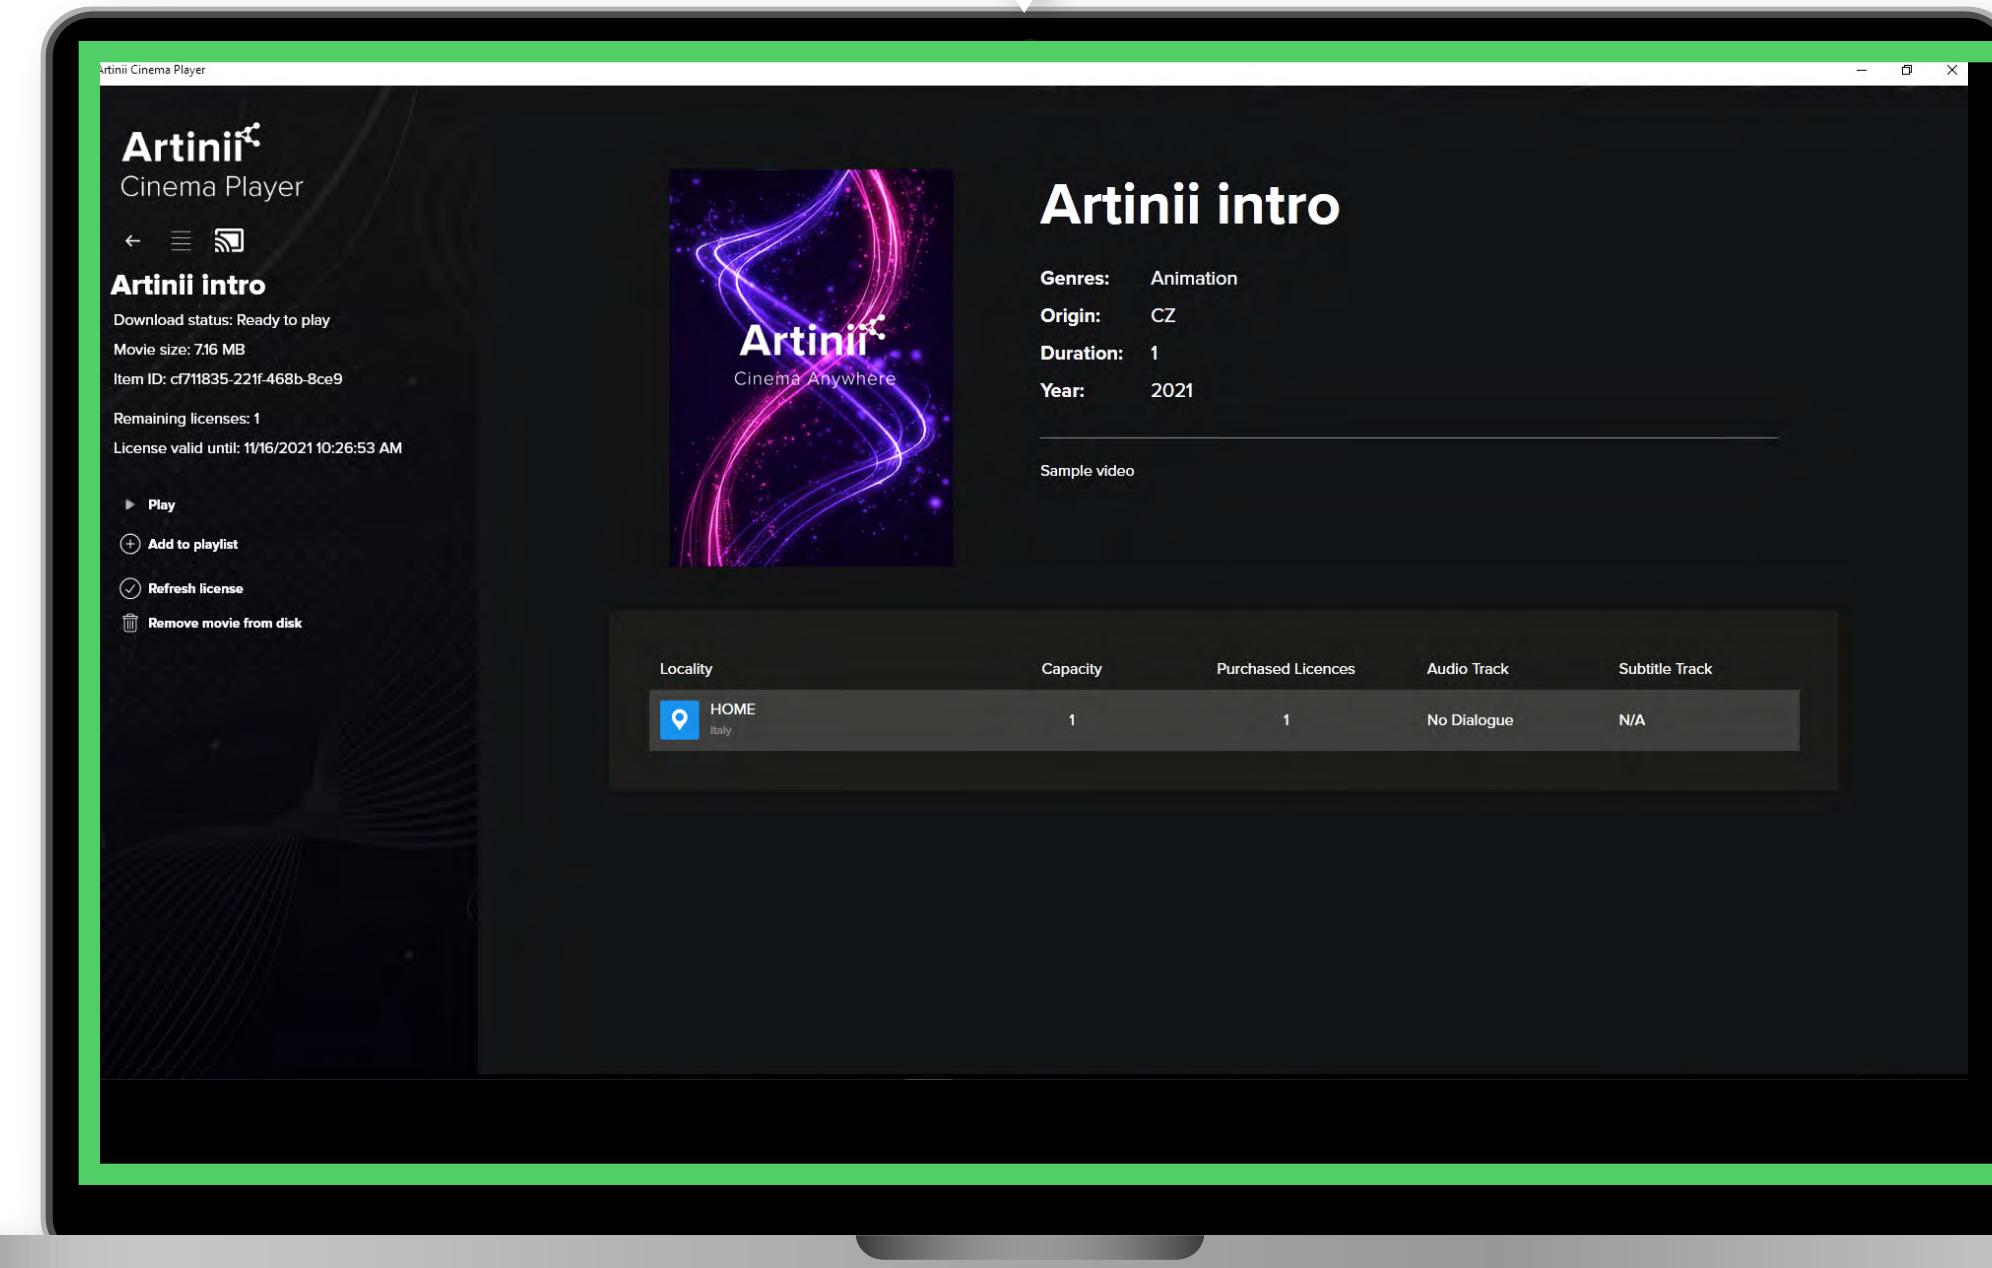

| | |
|-----------|-----------|
| Genres: | Animation |
| Origin: | CZ |
| Duration: | 1 |
| Year: | 2021 |

A "Sample video" button is located below the metadata. At the bottom, a table provides location information:

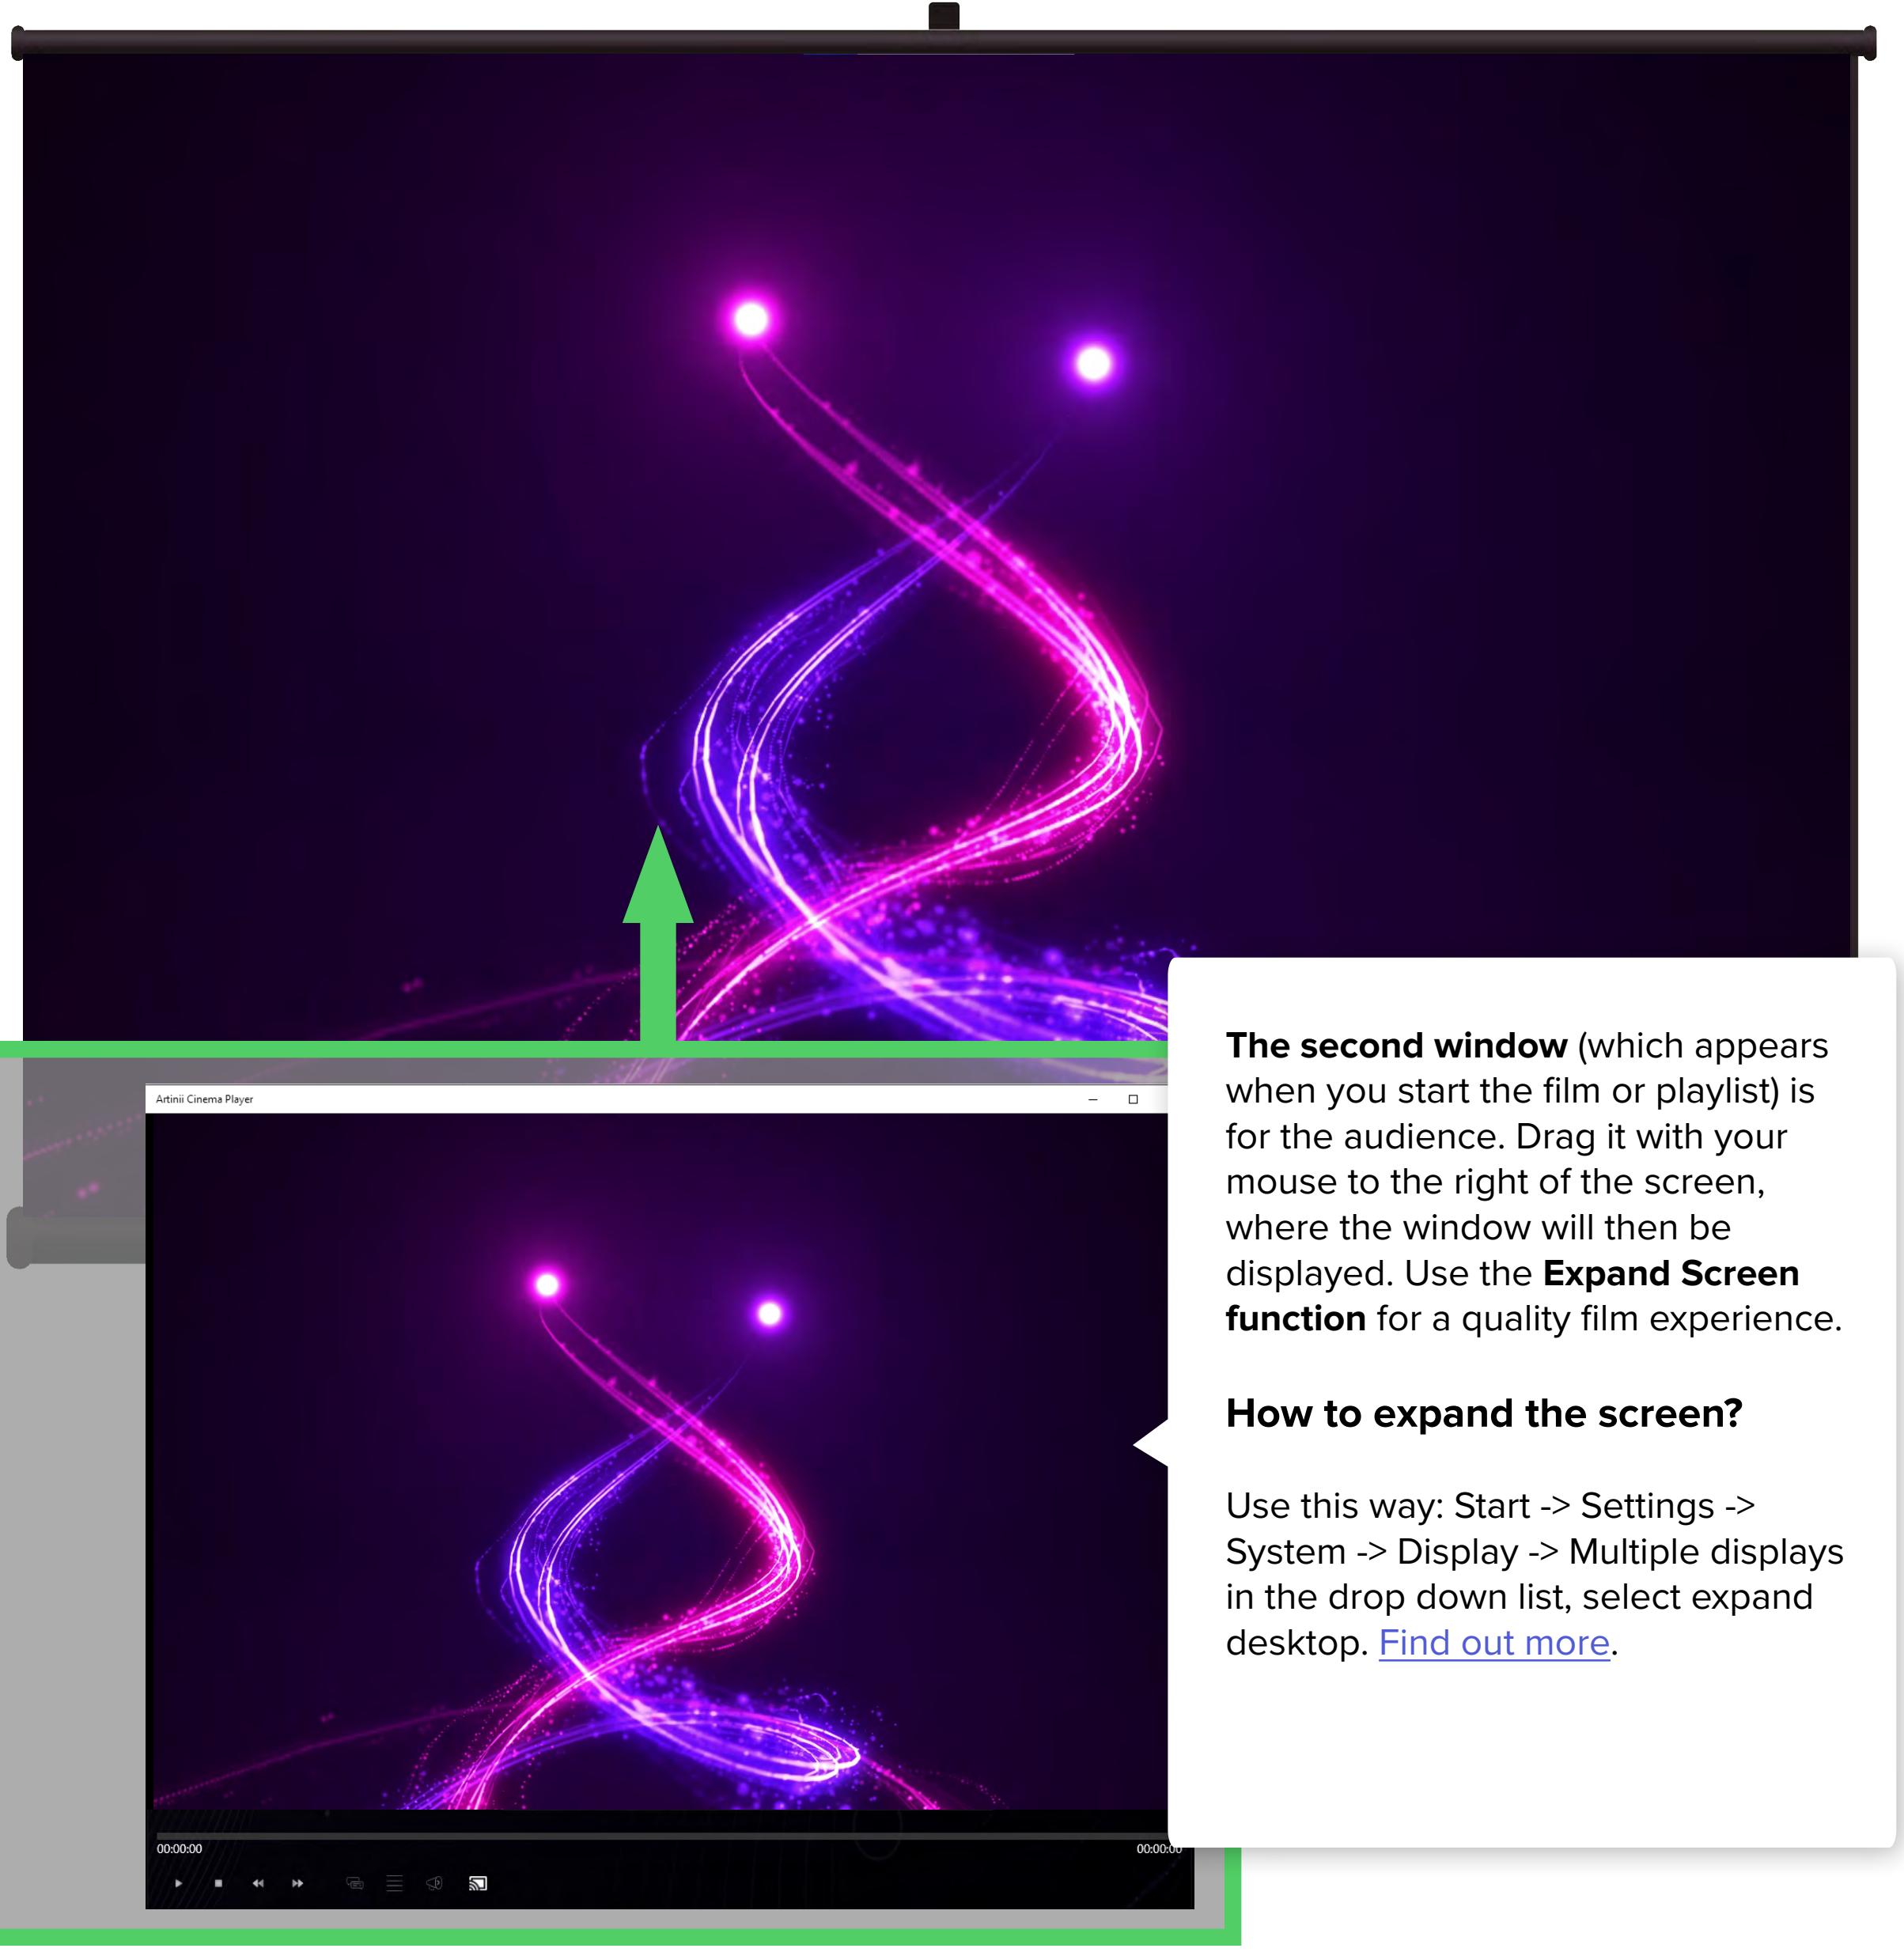

| Locality | Capacity | Purchased Licences | Audio Track | Subtitle Track |
|---------------|----------|--------------------|-------------|----------------|
| HOME Italy | 1 | 1 | No Dialogue | N/A |

If problems occur during playback (e.g. power failure) and there are no licenses left for playback, an emergency license can be requested to complete the screening. Simply click on **Request emergency license**, write the reason for the request and it will be granted immediately. This function can be used even without an internet connection.

HOW TO SCREEN CORRECTLY

Leave the library window on your computer desktop. This is the environment where you can control the playback of the film.

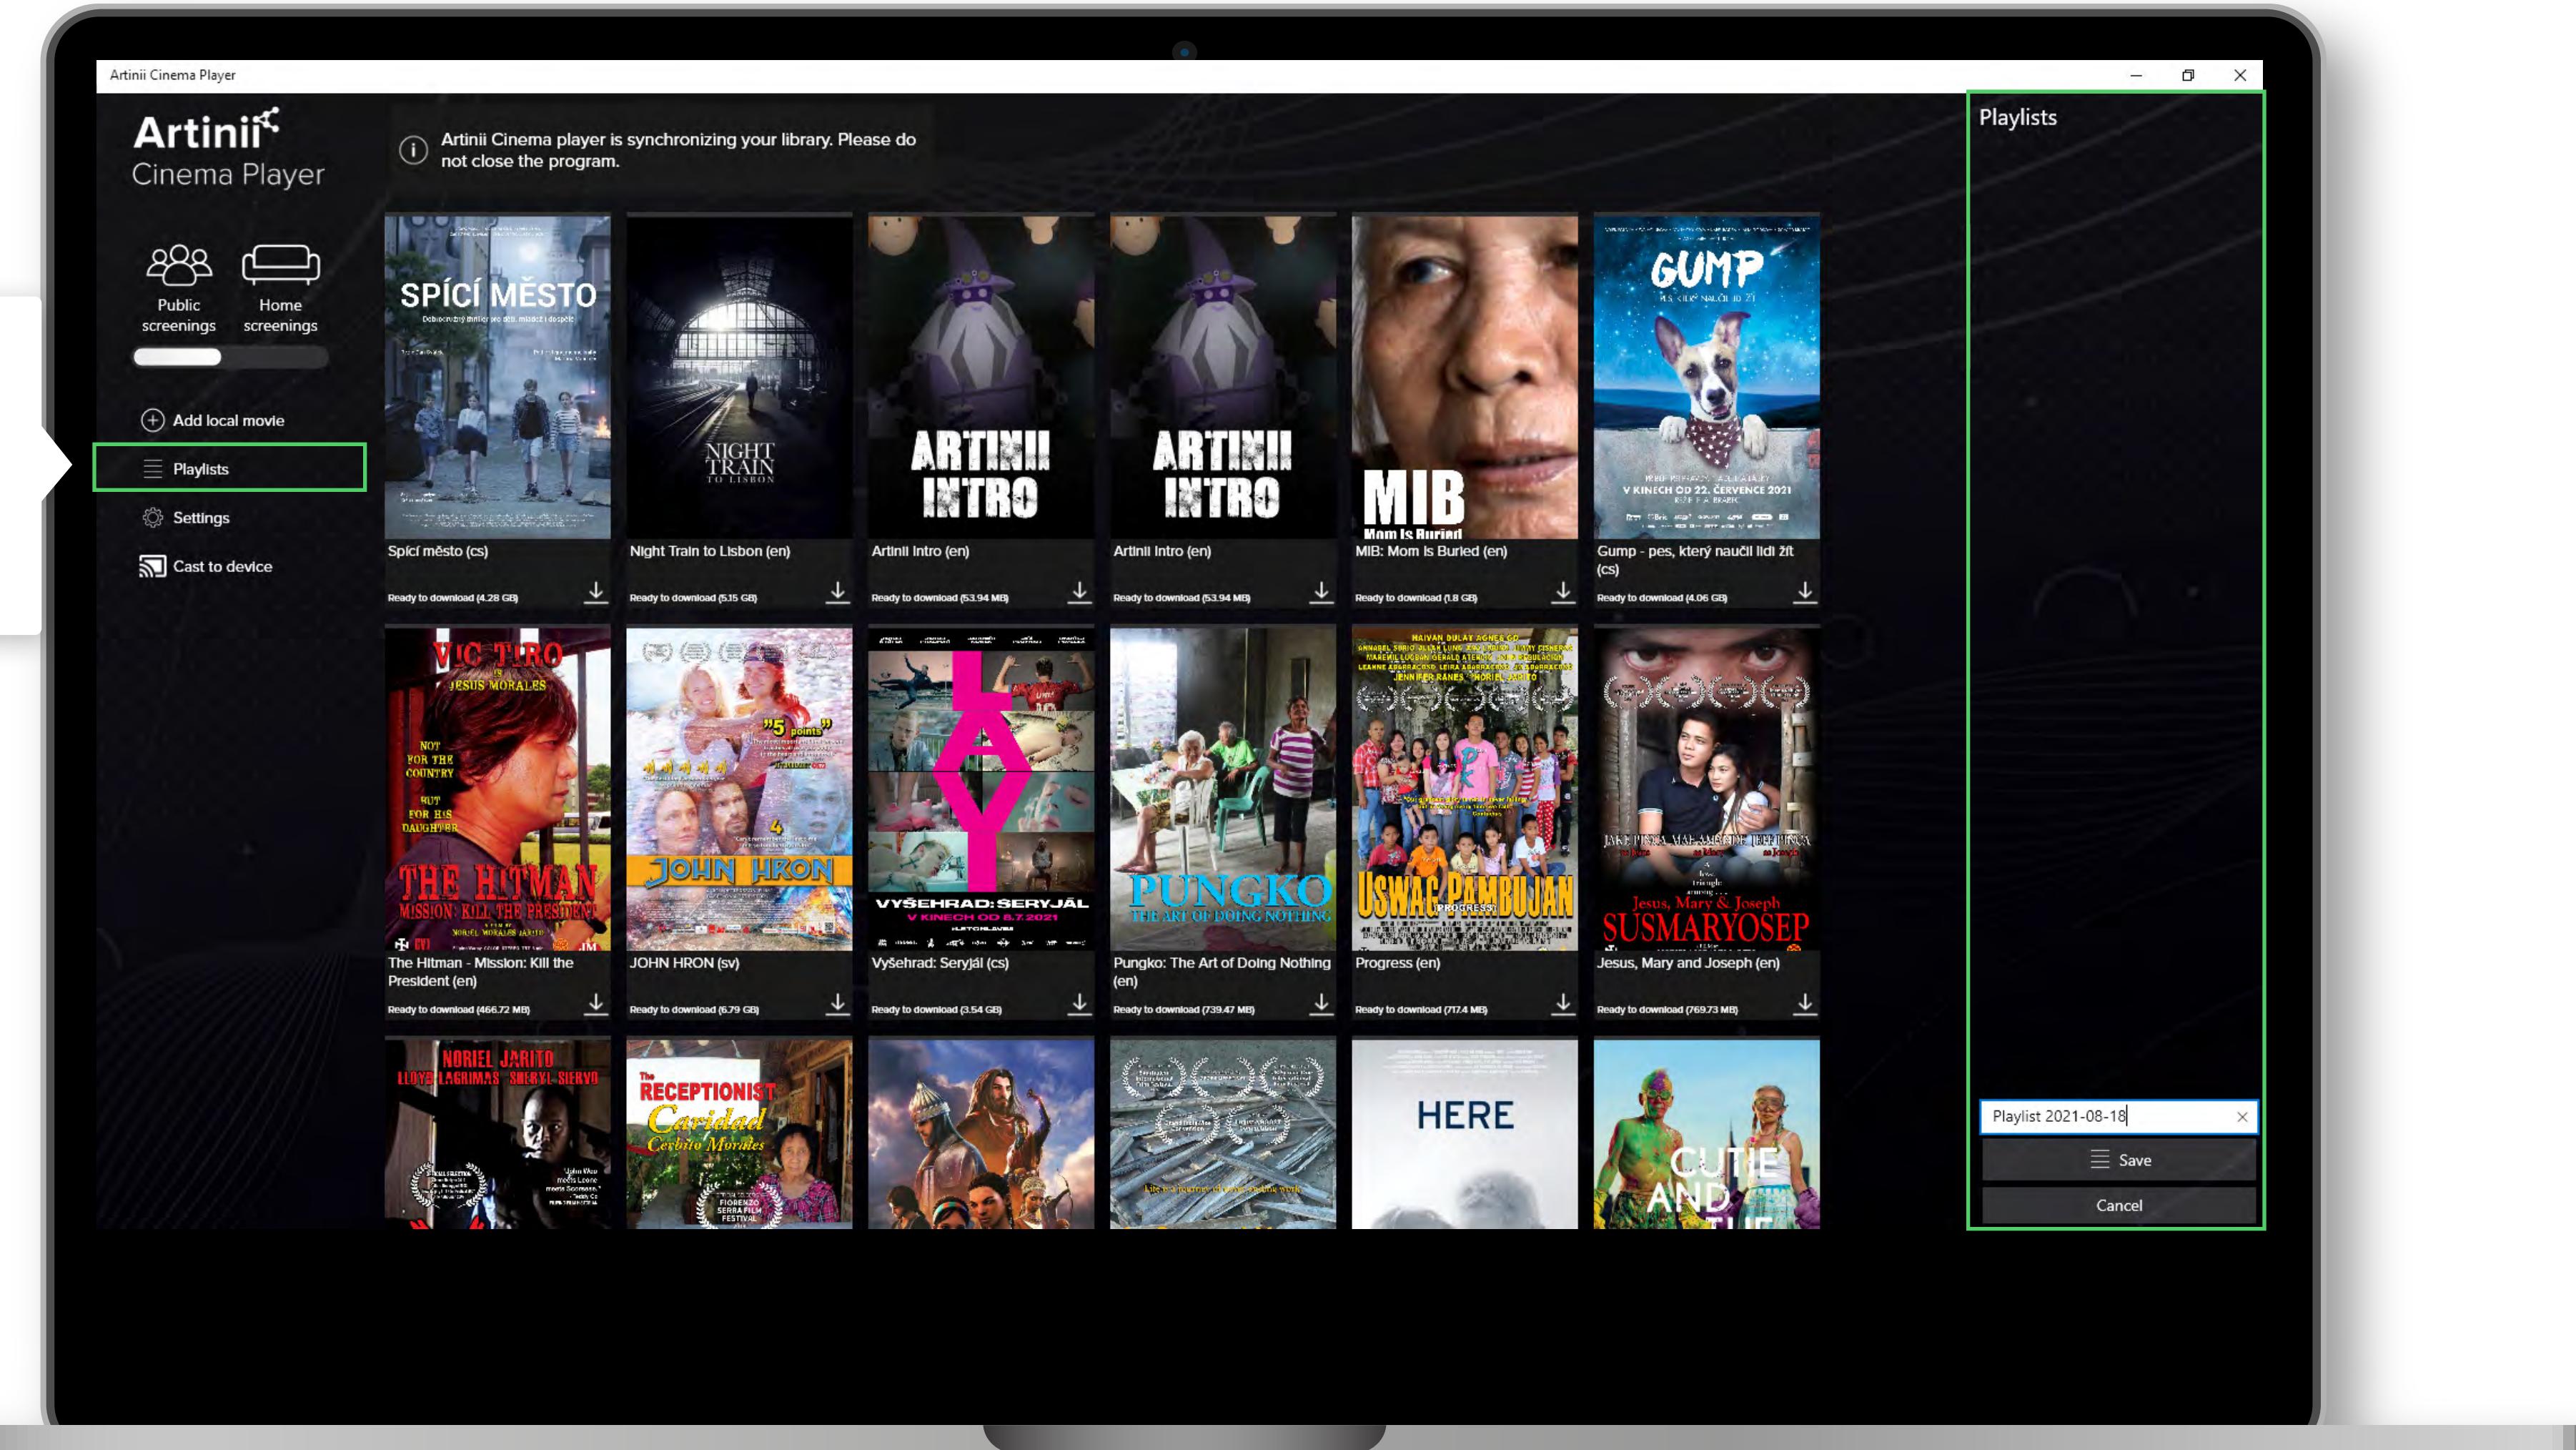

The second window (which appears when you start the film or playlist) is for the audience. Drag it with your mouse to the right of the screen, where the window will then be displayed. Use the **Expand Screen function** for a quality film experience.

How to expand the screen?

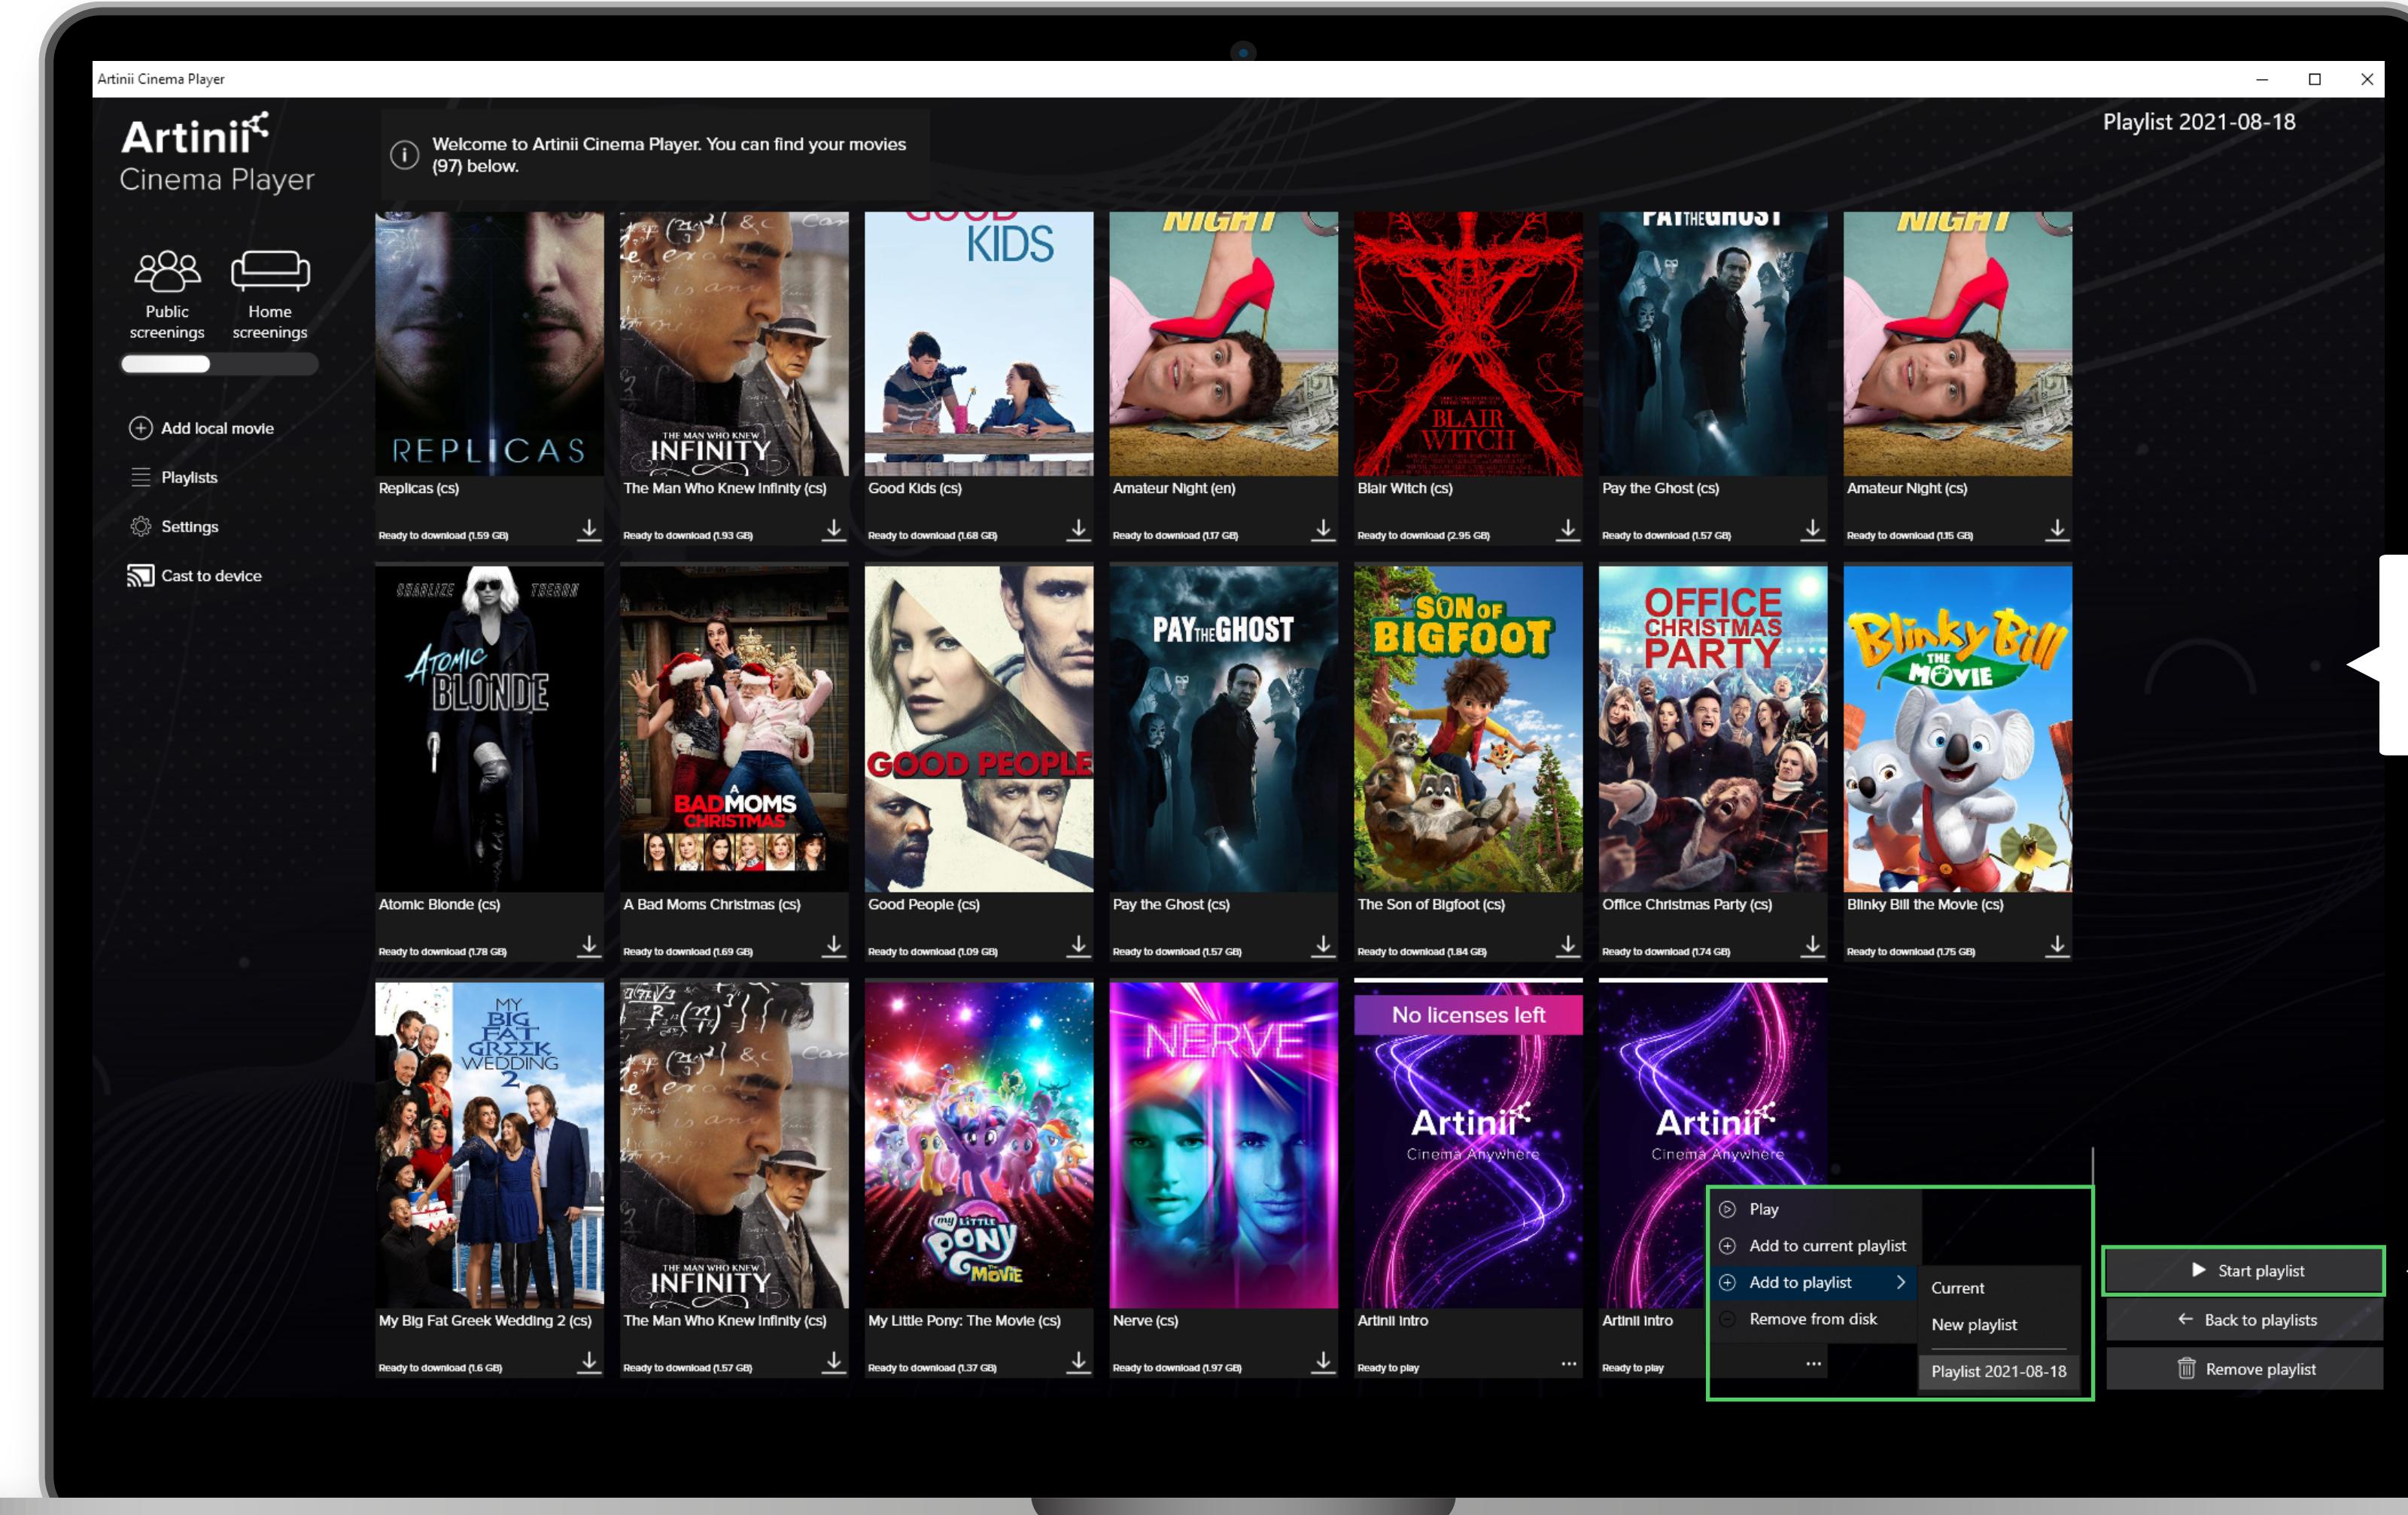

Use this way: Start -> Settings -> System -> Display -> Multiple displays in the drop down list, select expand desktop. [Find out more](#).

PLAYLISTS

If you need to play another video before screening or after the film, use the **Playlist** feature. With the playlist function, you can prearrange all the videos and the film you need for screening.

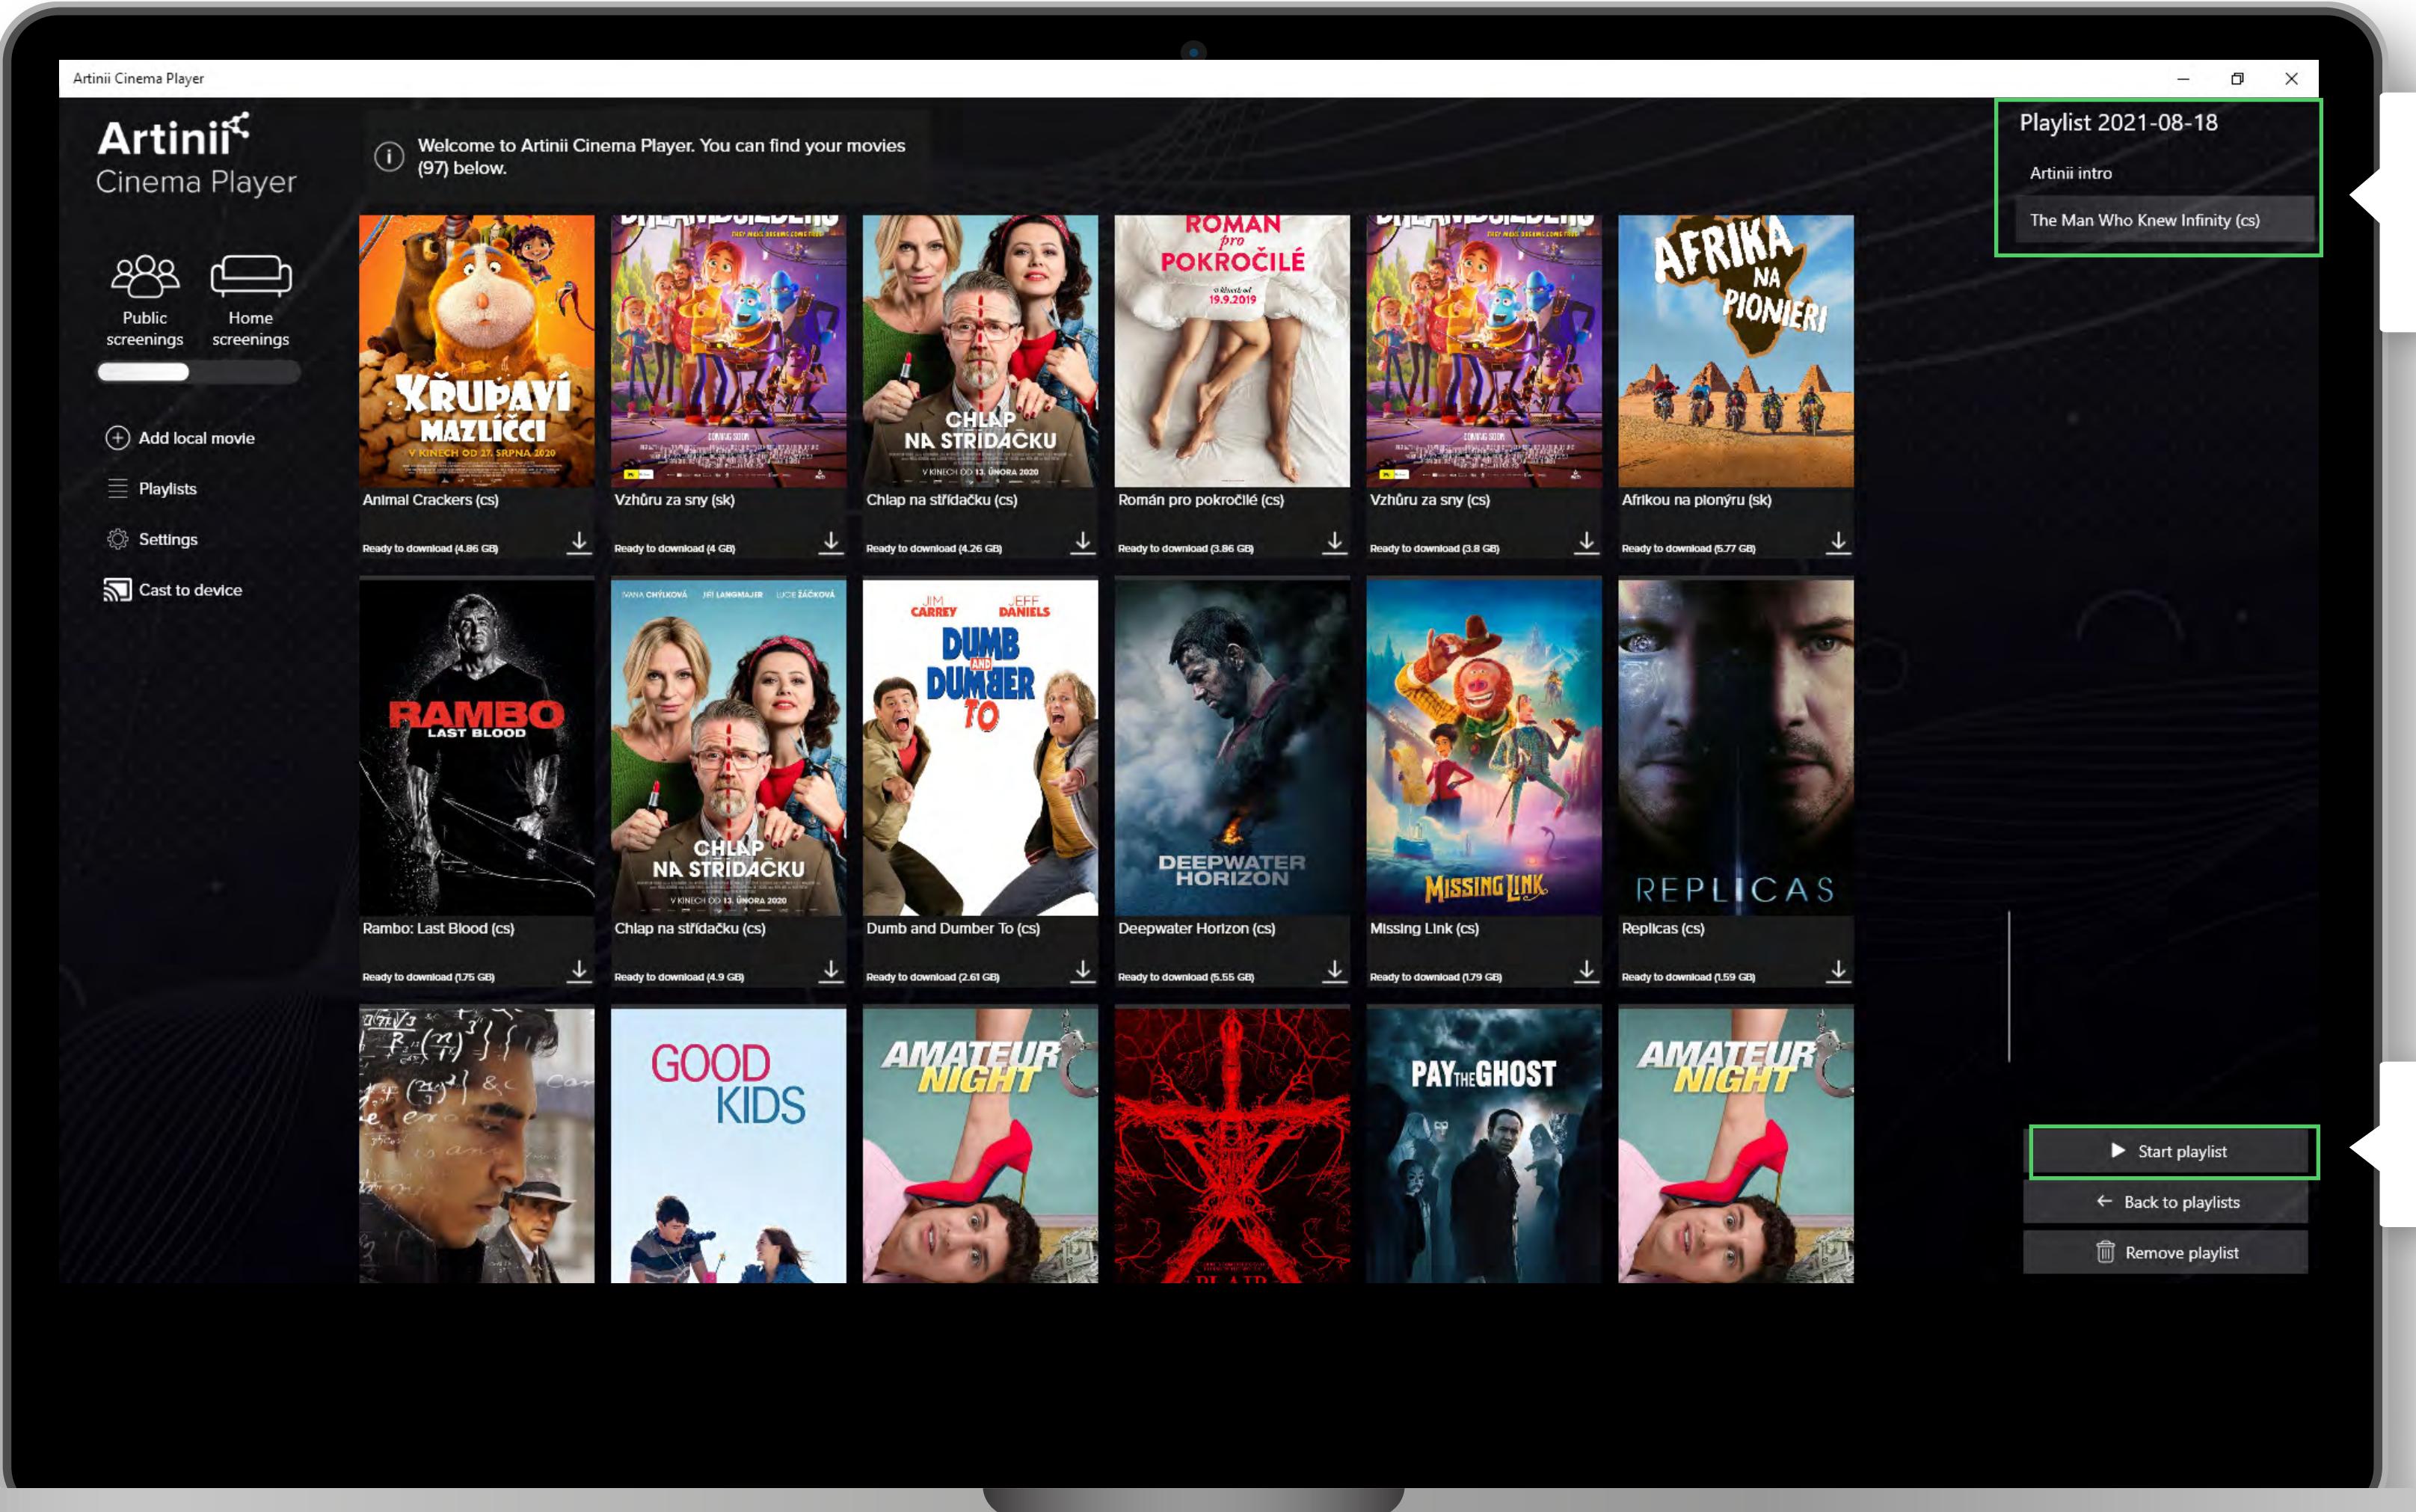

PLAYLISTS

You can add Artinii films as well as files from your local drive to the playlist.

To start screening using the playlist, click on **Start playlist**.

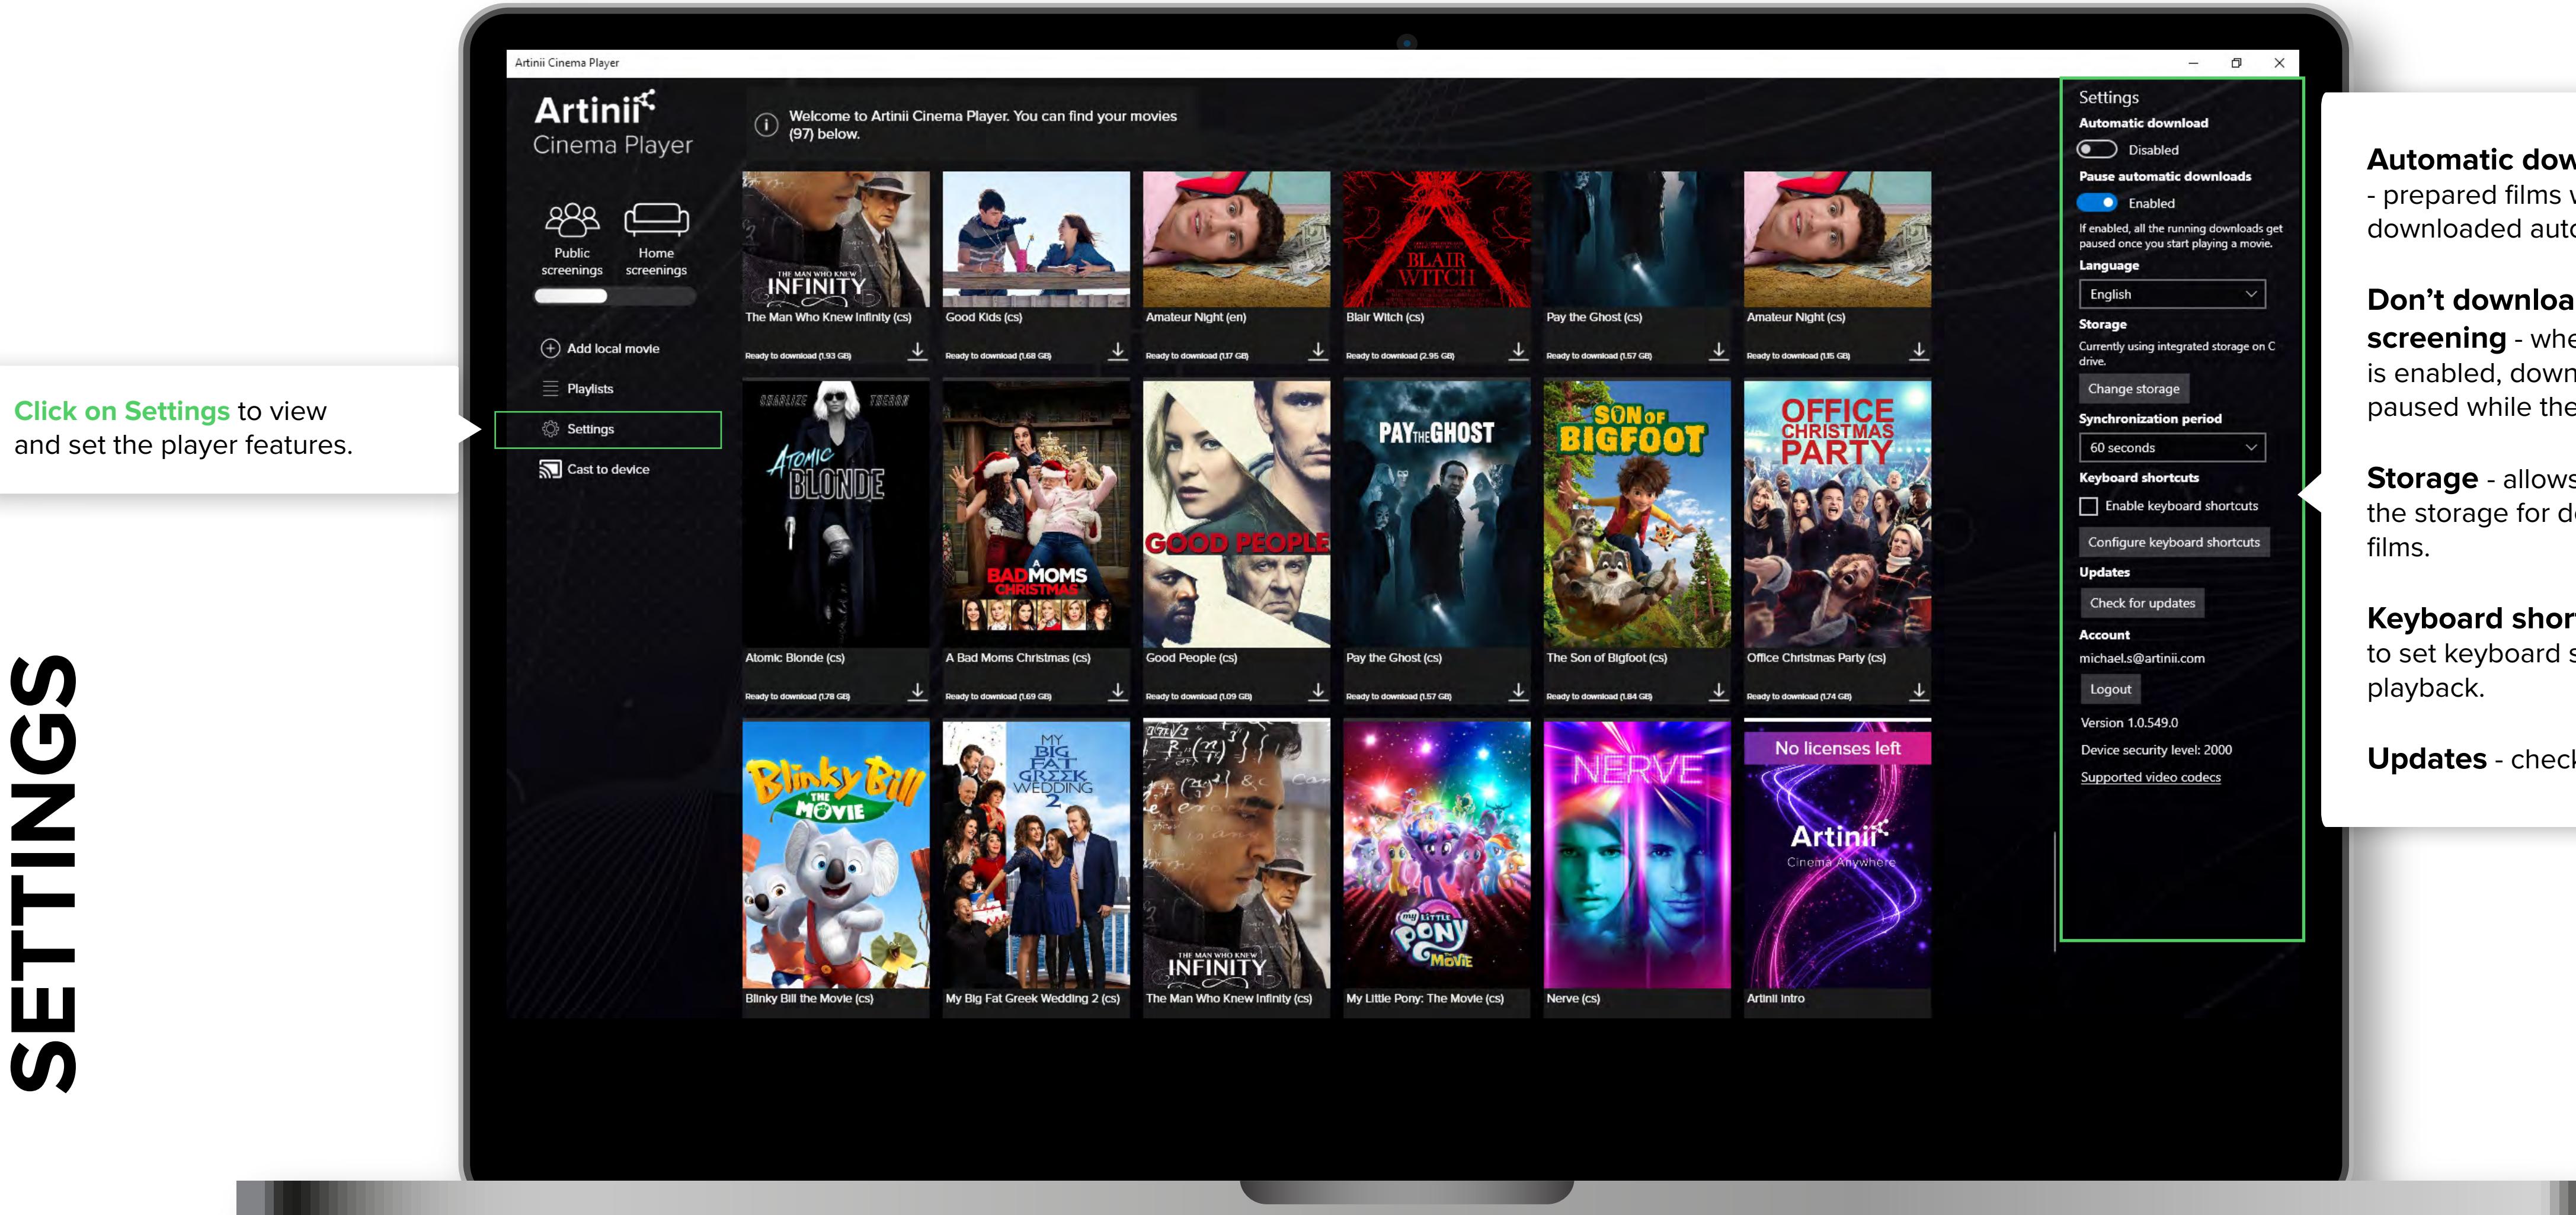

PLAYLISTS

The ability to change the order (by scrolling up or down) will ensure that you can screen in the sequence you want.

To start screening using the playlist, click on **Start playlist**.

SETTINGS

Automatic downloading

- prepared films will be downloaded automatically.

Don't download while screening - when this setting is enabled, downloads will be paused while the film is playing.

Storage - allows you to change the storage for downloaded films.

Keyboard shortcuts - option to set keyboard shortcuts for playback.
